Technical Rider Duo Trapeze

Even if the technical conditions don't match, please contact us anyway, until now we have always found a solution to perform our act without any loss of quality. Don't hesitate to get in touch.

If there are no rigging possibilities, we can also provide our freestanding Trapeze structure, please contact us in advance!

Version 1:

- min. height: 5,20 meter, ideal height 7,00 meter till 8,50 meter.
- If higher than 8,50 meter please contact the artist, to be able to find a solution.
- Two fixed and reachable points with the „weight load limit“ (WLL) of 500 kilos at a distance of 70-90 cm to each other.
- One fixed point for the Rope next to the Trapeze at a distance of ca 20-60 cm to the Trapeze.
- Crash mat: length: 3,90 meter
width: 2 meter
height: 40cm
The mat will be provided by us.
- Stage dimensions: 4 meters long
3 meters wide
- Music system.

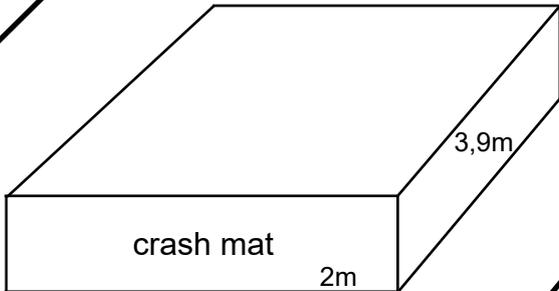

500kg

500kg

ca. 70-90 cm

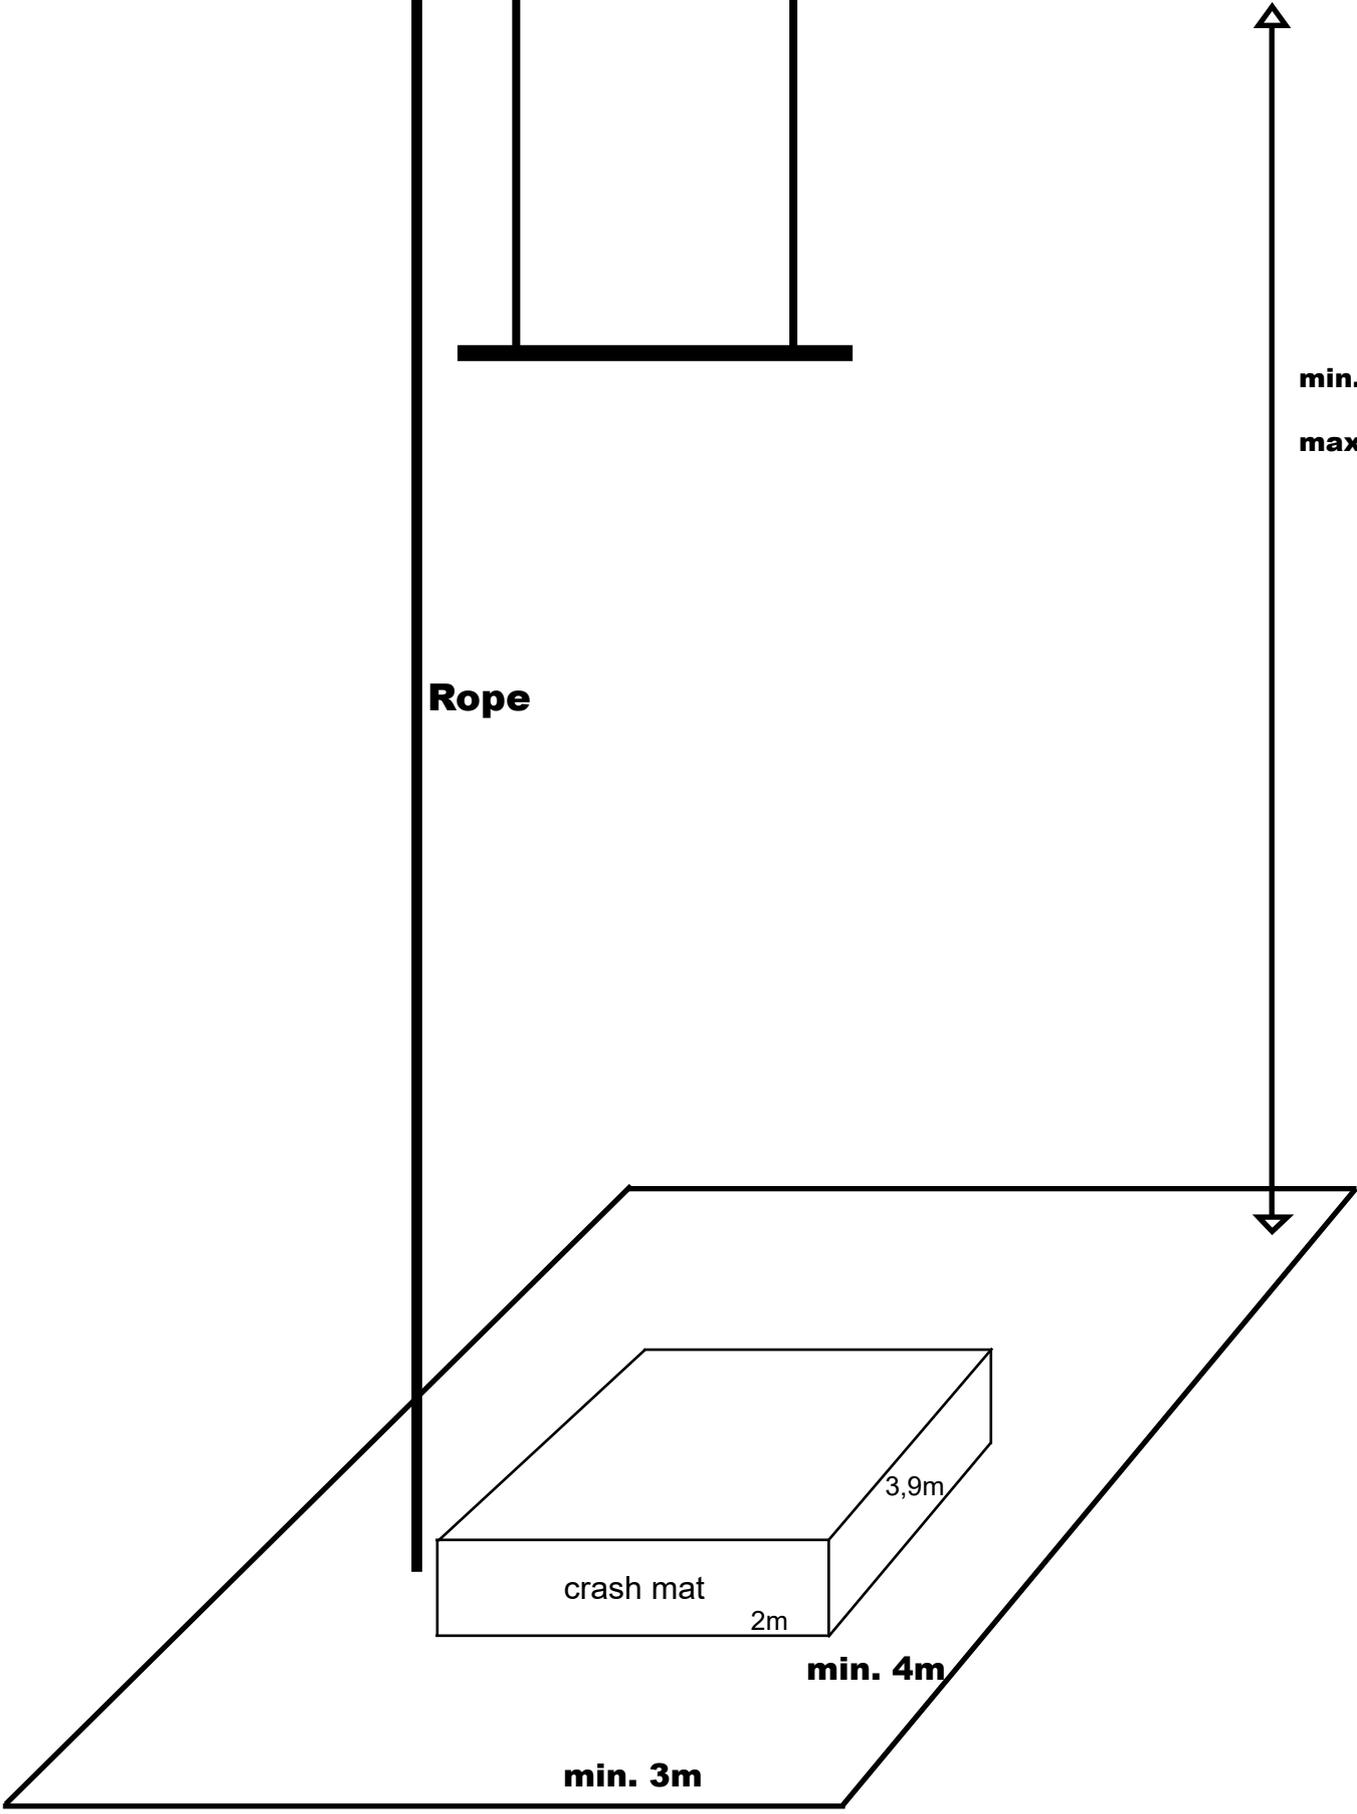

Rope

min. 5,2 m
max. 8,5 m

min. 4m

min. 3m

Version 2:

- If 8,50 meter or higher (please contact the artist for this version)

We use this “vertical bar” version if the fix points are 8,50 meter or, in that case we need:

- Two fixed and reachable points with the „weight load limit“ (WLL) of 500 kilos at a distance of 0m to 5m to each other.

- Four points with the “weight load limit” (WLL) of 150 kilos that are lower then the “vertical bar” and opposite each other.

- Crash mat: length: 3,90 meter

width: 2 meter

hight: 40cm

The mat will be provided by us.

- Stage dimensions: 4 meters long

3 meters wide

- Music system.
